PROFI

LE

I am a student pursuing my bachelor's in the field of computer science that is I am doing my BCA. I have been learning web development and making real-life projects on the frontend and backend tech stack like HTML, CSS, REACTJS, NODEJS, GIT, and GITHUB. I need an opportunity to prove my skills.

Apart from my tech skills, I have experience as an intern in social media management and have managed accounts on Twitter and Instagram of newly created accounts and in 2 to 3 months they have gained much better traction. I want to put my social and tech skills to use and work for your company.

PROJECTS

January 2022

Component Library

Villainess Component Library is made of vanilla CSS, JS, and HTML. This library has more than ten components like buttons, alerts, avatars, badges, grids, lists, etc.

March 2022

E-Commerce Web Application

This Application is made using ReactJS and mock backend. This app has many features like a home page, cart management, wish list management, filter methods, address management, and authentication.

Note: For more projects please refer my portfolio link given at top.
